***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: upon reconsideration, the primary reasons for allowance is the claimed subject matter is not taught by the prior art.

For example, with respect to claim 1, while Stephens, Jr. et al. teach ink fill tubes 150, 152, 154, and 156, the reference does not teach electrical connection cable connected between the cartridge and the off carriage ink supply for providing refill ink to the ink cartridge and control of the carriage and printhead, as claimed.

With respect to claim 8, While Cornell et al. teach upper doped layer 24 (see col 5, ln 65-col 6, ln 54), Cornell et al. does not teach the newly recited claim language which provides for an upper doped DLC layer and a lower doped DLC layer wherein the upper and lower doping materials are different.

With respect to claim 14, while portion 24 of the DLC island 21 is doped, portion 24 is not between metal layer 22 and insulation layer 20. Hence, doped portion 24 does not anticipate improved adhesion between a first conduction layer and a second insulating layer, as claimed.

The examiner maintains the same reasons for allowance for claims 22-38 as set forth in office action mailed 10/13/2004.

In light of the aforementioned remarks, claims 1-9 and claims 11-38 are deemed to be allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
